# DRUM GAUGE FAMILY

The **Superior Drum Gauge** (SDG) Family is designed to help monitor the rate and usage of chemical injection. The SDG family offers multiple configurations to fit your chemical injection needs. By using a Superior SDG you can be certain that your chemical usage is efficient and accurate.

Superior Products offers two different frame sizes in the Drum Gauge Family, the 596 and the 929 gauges. The gauges are different sizes with different connections but still function in the same manner. The 929 gauge is designed to work with standard manifold kits and used as a pump setting gauge.

## SDG
Superior Drum Gauge
